hundreds of tips to create internal project ownership, select ERP software, manage service providers, transfer software knowledge, develop the right implementation strategies, establish a realistic schedule and budget, and streamline business processes. It is a guide to making informed decisions during each project phase. The information is applicable to new implementations and system upgrades. Reviews "You owe it to your company and yourself to read this book. If you do so, you will sharply increase your odds for success and spend a lot less money. Steve has done the ERP industry a big service." - Thomas F. Wallace, early ERP pioneer, author, and Distinguished Fellow at The Ohio State University Center for Operational Excellence. "There really aren't many "must-read" ERP books in the 30 year (or so)

history of ERP, but you can add this book to the must-read list. The book fits nicely into what I call the Center of Excellence movement - the push by ERP customers to gain more value out of their ERP investments and endure less headaches." - Jon Reed, SAP/ERP Market Analyst. "I love this book." - R. Ray Wang. CEO and Principal Analyst at Constellation Research and a founding partner of the Altimeter Group. "If the Project Management Institute (PMI) had a certification program in ERP Management, this would be the only textbook needed." - Andy Klee, President, Klee Associates, ERPtips.com (SAP), and JDEtips.com (JD Edwards).

Exploration of Economic Data", an interdisciplinary and international project in the frame of ERASMUS+ funded by the European Union. The project aims to exchange interdisciplinary knowledge in the fields of economics and geomatics. For the newly introduced courses, interdisciplinary learning materials have been developed by a team of lecturers from four different universities in three countries. In a first study block, students were taught methods from the two main research fields. Afterwards, the knowledge gained had to be applied in a project. For this international project, teams were formed, consisting of one student from each university participating in the project. The achieved results were presented in a summer school a few months later. At this event, more methodological knowledge was imparted to

This 4th edition continues to be vendor-agnostic and has been substantially revised to keep pace with technological advances and current research in ERP. Modern ERP begins with an introduction to ERP, followed by ERP technology, business process reengineering (BPR), and process mapping. Also discussed is the myriad of activities involved in planning for and implementing ERP systems and the functionality included in ERP such as financial management, sales and order fulfillment, supply chain, and human capital management. The book concludes with ERP security and business analytics. Innovative graphics and screenshots of ERP, CRM, and business analytics software have been included in the text to facilitate the learning process.

**How to Rewire Your Brain to Improve** virtually every aspect of your life-based on the latest research in neuroscience and psychology on neuroplasticity and evidence-based practices. Not long ago, it was thought that the brain you were born with was the brain you would die with, and that the brain cells you had at birth were the most you would ever possess. Your brain was thought to be “hardwired” to function in predetermined ways. It turns out that's not true. Your brain is not hardwired, it's "softwired" by experience. This book shows you how you can rewire parts of the brain to feel more positive about your life, remain calm during stressful times, and improve your social relationships. Written by a leader in the field of Brain-Based Therapy, it teaches you how to activate the parts of your brain that have been underactivated
