Guide

1. Frequency Plan: Frequency Hopping plan differs from the conventional fixed frequency plan. The plan depends upon the type of Frequency Hopping system used. In case of SFH including BCCH

Download File PDF

Frequency Hopping

Frequency hopping sequence is not a practical option, as it results in loss of traffic channels on BCCH carrier. A separate frequency plan is prepared for the BCCH carriers.

Frequency Hopping

Eg:- If the operator has frequencies from 1 -32, then he can use 1-15 for BCCH and 17-32 for hopping (MA).
Hopping Sequence Number (HSN):
Determines the hopping order used in the cell. 64 different HSNs can be assigned, where $HSN = 0$ provides a cyclic hopping sequence and $HSN = 1$

A LE70-915 module operating with

Download File PDF

Frequency Hopping

Frequency hopping selects each of the 50 available channels based on a fixed time schedule. The time during which a module stays on each channel is called dwell time and is set to 350 ms. The channel sequence (hopping scheme) is defined by tables hard-coded in the module firmware.
