Compact and easy to use, Kaplan & Sadock's Concise Textbook of Clinical Psychiatry, Fourth Edition is an authoritative, affordable text that provides must-know information in clinical psychiatry. Containing the most relevant clinical material from the best-selling Kaplan and Sadock's Synopsis of Psychiatry, Eleventh Edition, it offers step-by-step guidance on the clinical examination, the psychiatric report, medical assessment of the psychiatric patient, laboratory tests, and signs and symptoms, as well as all psychiatric and substance-related disorders, with special chapters on children, adolescents, and the elderly. It also covers special topics such as emergency psychiatry, forensic psychiatry, ethics, and palliative and end-of-life care.

Riley Blakely and the remainder of Grandview High's french class is heading out on a school trip to Paris. The three weeks in Paris are supposed to be an 'educational opportunity' for this lot. But of course, these hormonal teenagers just cannot abide by the rules. The one rule set by their lovely Mr. Walker: You cannot room with somebody of the opposite gender.So what does this french class do? Room with the opposite gender, with a funny way of picking roommates. Chit picking. Because hormonal teenagers can just never get enough.Insert Asher West. Her not so secret annoying hater. It's a hate-hate relationship.He's the guy who picked Riley's name. He's the most popular guy in the freaking school and Riley? Not so much. Put the two together and you'll get a whole lot of arguments and awkward moments.They're roommates and they're stuck in Paris, the city of love and the city of lights

Thoroughly updated for its Third Edition, this popular quick-reference handbook remains a staple for medical students on psychiatric rotations as well as psychiatric residents and practitioners. In an easy-to-scan outline format, the book presents the etiology, epidemiology, clinical characteristics, and treatment of all psychiatric disorders. Additional chapters cover the psychiatric examination, special populations, psychotherapy, biological therapies, medication-induced movement disorders, legal issues, and laboratory tests.The book is replete with tables and includes color photographs of psychiatric drugs. Each chapter ends with suggestions for further reading, which include cross-references to specific page numbers in Kaplan and Sadock's Comprehensive Textbook of Psychiatry, Seventh Edition.

Foreword by Dr. Asad Madni, C. Eng., Fellow IEEE, Fellow IEE Learn the fundamentals of RF and microwave electronics visually, using many thoroughly tested, practical examples RF and microwave technology are essential throughout industry and to a world of new applications-in wireless communications, in Direct Broadcast TV, in Global Positioning System (GPS), in healthcare, medical and many other sciences. Whether you're seeking to strengthen your skills or enter the field for the first time, Radio Frequency and Microwave Electronics Illustrated is the fastest way to master every key measurement, electronic, and design principle you need to be effective. Dr. Matthew Radmanesh uses easy mathematics and a highly graphical approach with scores of examples to bring about a total comprehension of the subject. Along the way, he clearly introduces everything from wave propagation to impedance matching in transmission line circuits, microwave linear amplifiers to hard-core nonlinear active circuit design in Microwave Integrated Circuits (MICs). Coverage includes: A scientific framework for learning RF and microwaves easily and effectively Fundamental RF and microwave concepts and their applications The characterization of two-port networks at RF and microwaves using S-parameters Use of the Smith Chart to simplify analysis of complex design problems Key design considerations for microwave amplifiers: stability, gain, and noise Workable considerations in the design of practical active circuits: amplifiers, oscillators, frequency converters, control circuits RF and Microwave Integrated Circuits (MICs) Novel use of "live math" in circuit analysis and design Dr. Radmanesh has drawn upon his many years of practical experience in the microwave industry and educational arena to introduce an exceptionally wide range of practical concepts and design methodology and techniques in the most comprehensible fashion. Applications include small-signal, narrow-band, low noise, broadband and multistage transistor amplifiers; large signal/high power amplifiers; microwave transistor oscillators, negative-resistance circuits, microwave mixers, rectifiers and detectors, switches, phase shifters and attenuators. The book is intended to provide a workable knowledge and intuitive understanding of RF and microwave electronic circuit design. Radio Frequency and Microwave Electronics Illustrated includes a comprehensive glossary, plus appendices covering key symbols, physical constants, mathematical identities/formulas, classical laws of electricity and magnetism, Computer-Aided-Design (CAD) examples and more. About the Web Site The accompanying web site has an "E-Book" containing actual design examples and methodology from the text, in Microsoft Excel environment, where files can easily be manipulated with fresh data for a new design.

This book presents updated clinical material on child and adolescent psychiatry from the best-selling Kaplan and Sadock's Synopsis of Psychiatry, Tenth Edition. Coverage includes clinically relevant information on normal and abnormal development; examination; neuroimaging; learning, communication and behavioral disorders; adolescent substance abuse; forensic issues; and the spectrum of psychiatric problems such as depression and bipolar disorders. Treatment chapters include a broad range of psychopharmacotherapeutic and psychotherapeutic techniques, and the many controversies related to appropriate use of medication in children are addressed. The book is DSM-IV-TR compatible and replete with case studies and tables, including DSM-IV-TR tables.

Ever since humans became self-aware, we have struggled to find the meaning of life. The price we paid for becoming intelligent was to become painfully ignorant of the difference between good and evil. Adi, a 10-year-old boy, works together with two old philosophers as they try to unravel the prophecy of a promised King. With insatiable curiosity, Adi must work with the wise men as they rationalize with each other on why and how humans became intelligent. Together they attempt to answer some of the most profound questions related to existence. Does evolution end with human beings or is there an 'Overman' who can reach evolution's pinnacle? Will this Overman be able to define values for humankind? Centuries later a young boy promises his mother that he will always uphold the love that she has taught him. It is a promise that drowns him in the nectar of the gods. Krish grows up to be an engineer and joins a team of scientists as they try to create artificial consciousness in a machine. Krish soon realizes that he has a bigger fight on his hands. A fight to preserve love in a desolate world. His quest for true love ultimately leads him down a path where he comes face to face with a fearsome snake delivering a kiss of death. Humans have come a long way by questioning the nature of objects around us and pushing the limits of our intelligence, but it's now time that we ask the greatest question yet: when does intelligence transcend to become consciousness?

Rip Van Goofy was a friendly fellow who lived in a sleepy town. He was always chatting with his friends and loved to go fishing. But when his friends were busy one sunny afternoon, Rip Van Goofy set out alone to fish at his favorite fishing hole. Then, with his line in the water, Goofy fell asleep...and woke up forty years later! Don't miss this retelling of the classic tale of Rip Van Winkle—with a Disney twist!

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for DISCIPLE IV: UNDER THE TREE OF LIFE. The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

This is a new edition of a successful introductory textbook on the subject of psychiatry. Clearly written and rich in pedagogic features - such as summary boxes, clinical cases and other aid memoirs - this book is tailored to the learning needs of those entering the discipline for the first time. Particularly suitable for medical students, this book will also act as a 'primer' for post-graduates first entering the speciality with a view to a long-term career in the discipline. New edition of a well established text with a strongly pedagogic approach to the subject of psychiatry Logical writing style gives ready access to key information Includes many illustrations Contains practical examples throughout to demonstrate the importance of psychiatry to all areas of medicine Ideal for medical students and junior doctors Suitable as a 'primer' for specialist trainees entering the discipline for the first time Contains self-assessment material to ensure thorough exam preparation New layout aids accessibility and 'ease of learning' New chapter on mental health legislation Covers recent changes in neuropsychopharmacology Use of colour illustrations Contains practical advice on patient management - commencing drug therapy and managing self-harm, for example Enhanced sections on autism and other pervasive developmental disorders Explores capacity and risk assessment Enhanced discussion of the use of psychotherapy in line with current practice

Trees Up Close offers an intimate, revealing look at the beauty of leaves, flowers, cones, fruits, seeds, buds, bark, and twigs of the most common trees. With more than 200 dazzling photos, you will be amazed by the otherworldy beauty of the acorns from a sawtooth oak, enchanted by the immature fruits of a red maple, and dazzled by the delicate emerging flowers of the American elm.
