capacity models. 4) The cooler is broken – It does happen. If none of the above applies and your water is still tepid ...

Water Cooler Troubleshooting Guide

Usually, the reason behind a water cooler not dispensing water is an airlock that is a result of the air pressure that is forced into the water cooler as the bottle is placed on it. We recommend that you remove the water bottle from the water cooler, and then place it back on the water cooler. While you do this, ask a colleague to hold both taps open until water comes through them. If doing ...
