Impression Management 101: Managing Social Media. Social media platforms give adolescents the unique ability to share their lives and connect with others in real time. While adolescents describe these platforms as a way for them to connect and maintain relationships with friends and family, social media also creates environments for bullying and negativity.

encouraging a positive outcome. Impression management is a common underlying process that involves social and cultural implications. In regard to the social implications, impression management allows people to carefully craft and construct their public perception. Erving Goffman (11 June 1922 - 19 November 1982) was a Canadian-born sociologist

### Art of Impression Management on Social Media

Impression management is a conscious or subconscious process in which people attempt to influence the perceptions of other people about a person, object or event by regulating and controlling information in social interaction. It was first conceptualized by Erving Goffman in 1959 in The Presentation of Self in Everyday Life, and then was expanded upon in 1967.

Impression management (also called self-presentation involves the processes by which people control how they are perceived by others. People are more motivated to control how others perceived them when they believe that their public images are relevant to the attainment of desired goals, the goals for which their impressions are relevant are valuable, and a discrepancy exists between how they want to be perceived and how other people perceive them.

This work offers critical inquiry into how identity is constructed, deconstructed, performed, and perceived on social networking sites (SNSs), such as Facebook, and LinkedIn.

This book provides original research on key issues in the field of identity management and social networking sites. The contributors to this volume draw on current research in the field and offer new theoretical frameworks and research methods, making the book useful for both students and scholars of social media.

After eight focus group sessions with 73 participants, the researcher found that users exercised a moderate amount of control over their content, particularly content that third parties shared about them. The most common form of control among both groups was untagging or deletion. The majority of users invested minimal effort in managing their profile pages. They were also slightly concerned about the impressions others might form about them. This concern was fueled significantly by a desire to avoid secondary impressions. Age may be a factor in how social network users regulate their content and manage their privacy, but the significance of age in impression management is still unclear. Impression management, as it currently exists, might not fully explain online behaviors of adult social network users. Future researchers should conduct detailed surveys to determine the relationship between age and impression management on social networking sites.

Edited by three of the world’s leading authorities on the psychology of technology, this new handbook provides a thoughtful and evidence-driven examination of contemporary technology’s impact on society and human behavior. Includes contributions from an international array of experts in the field Features comprehensive coverage of hot button issues in the psychology of technology, such as social networking, Internet addiction and dependency, Internet credibility, multitasking, impression management, and audience reactions to media Reaches beyond the more established study of psychology and the Internet, to include varied analysis of a range of technologies, including video games, smart phones, tablet computing, etc. Provides analysis of the latest research on generational differences, Internet literacy, cyberbullying, sexting, Internet and cell phone dependency, and online risky behavior

This book is about the ways which human behavior is affected concerns with people may be doing, their public impressions they typically prefer that No matter what else other people perceive them in certain desired ways and not perceive them in other, undesired ways. Put simply, human beings have a pervasive and ongoing concern with their self-presentations. Sometimes they act in ceflain ways just to make a particular impression on someone else mras when a job applicant responds inthat will satisfactorily impress the interviewer. But more often, people 5 concerns with others’ impressions simply constrain their behavioural options. Most of the time inclined to do things that will lead others to see us as incompetent, inwnoral, maladjusted, or otherwise socially undesirable. As a result, our concerns with others’ impressions limit what we are willing to do.Self-presentation almotives underlie and pervade near corner of interpersonal life.

The Oxford Handbook of Cyberpsychology explores a wide range of cyberpsychological processes and activities through the research and writings of some of the world’s leading cyberpsychology experts. The book is divided into eight sections covering topics as varied as online research methods, self-presentation and impression management, technology across the lifespan, interaction and interactivity, online groups and communities, social media, health and technology,video gaming and cybercrime and cybersecurity.

The present book contains the proceedings of two conferences held at the World Computer Congress 2010 in Brisbane, Australia (September 20-23) organised by the International Federation for Information Processing (IFIP). In the first part, the reader can find the proceedings of the 9th Human Choice and Computers International C-ference (HCC9) organised by the IFIP Technical Committee TC9 on the Relationship Between ICT and Society. The HCC9 part is subdivided into four tracks: Ethics and ICT Governance, Virtual Technologies and Social Shaping, Surveillance and Privacy, and ICT and Sustainable Development. The second part consists of papers given at the Critical Information Infrastructure Protection Conference (CIP) organized by the IFIP Technical Committee TC11 on Security and Privacy Protection in Information Processing Systems. The two parts of the book are introduced by the respective Conference Chairs. Chapter 1 introduces HCC9, providing a short summary of the HCC conference series, which started in 1974, and explaining the overview of HCC9, detailing the rationale behind each of the tracks in this conference. The details related to the papers of each track are discussed by the Track Chairs in the respective introductions to the specific tracks of HCC9 (Chaps. 2, 10, 16 and 22). Finally, Chap. 22 introduces the CIP part.

This sociological study uses online survey data from one hundred and six respondents to explore how social networking websites alter the social self. Critical and symbolic interactionist sociological theory is used as a means to understand the data. This dissertation specifically concerns how social networking websites shape identity, result in a more self-reflexive presentation of self, and serve as a means of both socialization and social control.
