The theory of environmental policy - CORE

The economic literature contained an apparently coherent view of the nature of the pollution problem together with a compelling set of implications for public policy. In short, economists saw the problem of environmental degradation as one in which economic agents imposed external costs upon society at large in the form of pollution.

Introduction: economics and environmental policy (Chapter ...

Environmental policy, any measure by a government or corporation or other public or private organization regarding the effects of human activities on the environment, particularly those measures that are designed to prevent or reduce harmful effects of human activities on ecosystems.

The Environmental Management: Theory, policy, practice module, at the University of Birmingham, provides an overview of some of the key principles and approaches available in environmental management, including the precautionary principle, ecosystems services and environmental impact assessment

Environmental Management: Theory, policy, practice ...

General principles. EU environment policy rests on the principles of precaution, prevention and rectifying pollution at source, and on the ' polluter pays ' principle. The precautionary principle is a risk management tool that may be invoked when there is scientific uncertainty about a suspected risk to human health or to the environment emanating from a certain action or policy.

The Theory of Environmental Policy by William J. Baumol ...

Theory of Sustainability. Sustainability describes a form of economy and society that is lasting and can be lived on a global scale. The society-changing potential of the claim: ' More justice between generations, more global justice – at the same time ' faces the peril of getting out sight. Sustainability is just not the trivial general claim to take social, economic and environmental policy serious independent of any relationship in time and space and to strike a sound balance between ...

The Theory of Environmental Policy: Baumol, William J ...

Environmental policy is made in a context of both market failure and government failure. On the one hand, leaving environmental protection to the free market, relying on notions of corporate social responsibility and altruistic consumer and shareholder preferences, will not deliver optimal results.
